**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, disclose, or suggest, either alone or in combination a piezoelectric transformer having a constraint layer mechanically bonded between a first electroded major face of a first input electro active disk and the first electroded major face of the first output electro active disk such that said constraint layer at least partially constrains the radial deformation of the first electroded major face of said first input electro active disk; wherein the constraint of the radial deformation of the first electroded major face of the first input electro active disk prevents the first electroded major face of the first input electro active disk from radially deforming as much as a second electroded major face of the first input electro active disk radially deforms such that there exists a difference between the amounts of radial deformation of the first and second opposing electroded major faces of the first input electro active disk. Therefore, the limitations contained on claims 1-17 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
